18 Danethorpe Road, Wembley HA0 4RQ, London, UK

PROFESSIONAL SUMMARY

Results driven software engineer with over 5 years of experience in developing and optimizing robust full-stack web applications and APIs. Proficient in a diverse range of technologies, including PHP Laravel, Node.js, GraphQL, Next.js, Vue.js, and AWS, with a strong focus on scalable architecture and microservices based solutions. Experienced in implementing unit testing and managing CI/CD pipelines, while adhering to Object Oriented Programming (OOP) principles and best practices. I thrive on taking challenges, learning and implementing new technologies, and sharing my skills with the team to foster a collaborative and innovative environment. Adept at working in Agile environments, contributing to efficient project management and product development. A strong communicator and team player, consistently delivering high impact solutions on time and within scope.

WORK EXPERIENCE

Software Engineer

Medic Care Direct • London (Harrow), UK (Part-Time)

April 2024 - Present

Responsibilities

- Developed and maintained a patient management system using PHP, Laravel, Inertia and Vue.js, improving efficiency in appointment scheduling and record-keeping.
- Optimized and secured the company's WordPress website, ensuring high performance and a seamless user experience.
- Provided IT support, troubleshooting software issues, and implementing system enhancements based on user feedback.

Software Engineer

Gapstars • Netherlands (Hybrid)

February 2023 - August 2023

Responsibilities

- Developed and implemented new features in PHP (Laravel), driving product improvements and resolving complex issues.
- Built reusable, modular Vue.js components with Pinia for state management; maintained high test coverage using Vitest to ensure reliability and maintainability.
- Conducted code reviews, ensuring adherence to coding standards and best practices, resulting in significant reduction in code-related bugs.
- Actively participated in architectural discussions, contributing to key decisions on system design and database schema, ensuring long-term scalability and performance.
- Identified and resolved performance bottlenecks in both frontend and backend codebases, significantly improving application speed and responsiveness.

Software Engineer (Full-Stack)

Adventus Education Pvt Ltd • Australia (Remote)

December 2021 - February 2023

Responsibilities

- Resolved system performance issues under heavy loads by optimizing codebase, implementing request chunking, and deploying AWS Load Balancers.
- Transitioned to a microservices architecture using Node.js, GraphQL, and Sequelize, improving system scalability and efficiency.
- Reduced AWS costs by implementing Facebook's DataLoader in GraphQL microservices, minimizing excessive queries through batching and caching.
- Conducted code reviews, writing confluence technical documentation, and adhering to coding standards, Test Driven Development (TDD), OOP, and best practices.

Associate Software Engineer - PHP Laravel (Backend)

Elegant Media Pvt Ltd • Australia (Hybrid)

October 2020 - December 2021

Responsibilities

- Developed APIs for Mobile and Web Applications using PHP Laravel, REST API, and Laravel TALL Stack (Livewire, Inertia.js, Tailwind).
- Implemented Stripe Payment Gateway for Mobile Apps and Web Applications, for payment processing.
- Applied TDD and OOP principles for maintainable code, and feature enhancements.
- Created API documentation with OpenAPI (Swagger) for efficient API integration and team collaboration.

Web Developer

Seven Media Group • Sri Lanka (On-site)

October 2018 - June 2020

Responsibilities

- Creating and maintaining mobile-first responsive e-commerce websites using WordPress and lead-generating responsive landing pages.
- Implementing website changes, improved website performance, and SEO requirements.
- Converting wireframes into responsive websites.

EDUCATION

Masters in Artificial Intelligence and Data Science - Distinction

University of East London (Docklands Campus, London, UK)

September 2024

Bachelor of Science in Software Engineering - First Class

Solent University - Southampton (BCAS, Colombo, Sri Lanka)

September 2020

SKILLS SUMMARY

HTML | CSS | Sass | PHP | JavaScript | GraphQL | Laravel | Vue.js | Node.js | Tailwind | Livewire | Inertia.js | FilamentPHP | Next.js | Apollo Server | Redis | MySQL | MongoDB | DynamoDB | Docker | CI/CD | Git | AWS | | Postman | Stripe | OpenAPI (Swagger) | WordPress | Jest | PestPHP | PHPUnit | SQLite.
